

TechCorp IAM Platform Implementation Plan

Enhancing Secure, Seamless Access
Across the Enterprise

EXECUTIVE SUMMARY

TechCorp is implementing a modern IAM platform to strengthen security and support global digital transformation.

This plan outlines the full implementation roadmap: phases, milestones, timelines, and resources.

Focus areas:

- Automated User Lifecycle Management
- Strong Access Control
- Secure Application Integration

PROJECT OBJECTIVES

AUTOMATE
ONBOARDING/OFFBOARDING

ENFORCE LEAST-PRIVILEGE
ACCESS & MFA

INTEGRATE CLOUD,
ON-PREM, AND LEGACY
APPS

REDUCE MANUAL
WORKLOAD

SUPPORT ZERO TRUST
MATURITY

ULM OVERVIEW

- HR as authoritative identity source
- Automated provisioning & deprovisioning
- Dynamic access updates
- Immediate offboarding

ULM BENEFITS

FASTER
ONBOARDING

REDUCED
OFFBOARDING RISK

LOWER SUPPORT
COSTS

CONSISTENT GLOBAL
IDENTITY
GOVERNANCE

ACCESS CONTROL OVERVIEW

RBAC/ABAC

MFA & Conditional Access

PAM for privileged accounts

Centralized visibility

ACCESS CONTROL BENEFITS

STRONGER SECURITY
POSTURE

REDUCED
UNAUTHORIZED
ACCESS

BETTER COMPLIANCE

IMPROVED
OPERATIONAL
EFFICIENCY

IMPLEMENTATION PHASES

KEY PHASE DETAILS

- Initiation: Scope, stakeholders, governance
- Assessment: Current-state review, gap analysis
- Design: Architecture, workflows, access model
- Implementation: Configure IAM, integrate HR, onboard apps
- Testing: Functional, integration, security, UAT
- Deployment: Phased rollout
- Optimization: Monitoring, improvements

INTEGRATION CHALLENGES

DIVERSE
APPLICATION
ECOSYSTEM

INCONSISTENT
AUTHENTICATION
METHODS

DATA
SYNCHRONIZATION
ISSUES

LEGACY SYSTEMS
WITHOUT MODERN
PROTOCOLS

BEST PRACTICES

- Standardize on OAuth 2.0, SAML, OIDC
- Implement SSO
- Automate provisioning/deprovisioning
- Use RBAC/ABAC
- Conduct thorough integration testing

TIMELINE & RESOURCES

Timeline (36 weeks):

- Initiation: 2
- Assessment: 4
- Design: 4
- Resource Planning: 2
- Implementation: 12
- Testing: 4
- Deployment: 8

Resources:

- IAM Architect & Engineers
- HRIS Specialist
- Security Engineers
- Application Owners
- PMO & Change Management

CONCLUSION

TechCorp's IAM program delivers a secure, scalable foundation for the business. By modernizing identity processes and strengthening access controls, the organization is positioned to:

- Reduce risk across global operations
- Improve user productivity and onboarding speed
- Streamline governance and compliance
- Support long-term Zero Trust and cloud initiatives

This implementation plan provides a clear, phased path to achieving these outcomes with minimal disruption.
